

Collection **2021-2022**

PROTO

Bring your desires to life

We make our prototypes at scale 1 according to the design imagined at Sima.

Each model is digitized in 3D before the production of a pre-series by the factory.

The tests carried out then lead to improvements until the final validation.

Non-contractual data. Some of the equipment in this brochure is only available as an option.

The image shows the front-left portion of a white and yellow Mash X-Ride 125 motorcycle. The bike is parked on a dark, textured surface, possibly a curb or step. The background is a light-colored, textured stone wall. The motorcycle features a white front fender, a large round headlight, a side mirror, and a yellow front wheel with a black tire. The Mash logo is visible on the front fork. The overall composition is clean and modern, with a focus on the bike's design and branding.

X-Ride 125

We only see her!

X-Ride 125 White Pearl

Powered by the brand new Hyosung 125 cc 15 hp 4T engine with liquid cooling, fuel injection, four valves, electric starter and 6-speed gearbox, **the X-Ride 125 becomes the new benchmark in its category.**

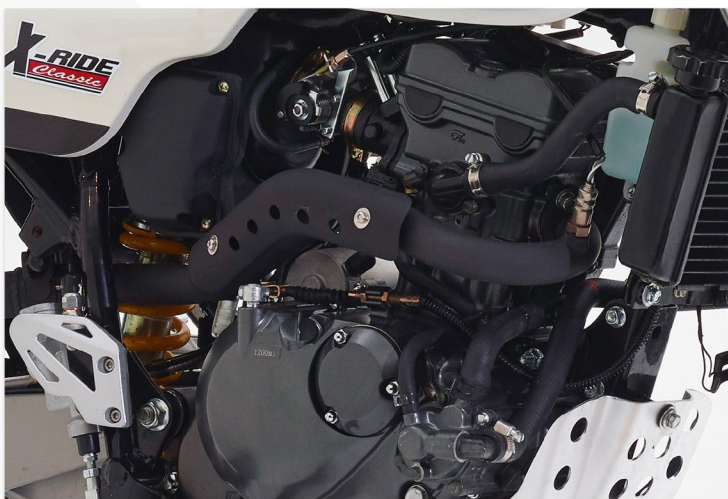

Its "back to the future" design and its first-rate performances naturally lead it to occupy a leading position.

Inverted forks, monoshock, aluminum swingarm and long travel suspensions provide the X-Ride 125 with excellent ride comfort on all surfaces.

On the safety side, it has wavey ABS disc brakes.

A photograph of two women standing outdoors next to a motorcycle. Both women are wearing matching light pink hoodies with the 'Mash' logo and 'MOTORCYCLE' text, black helmets with gold stripes, and black gloves. The woman on the left is leaning against the front of a silver motorcycle with a yellow-rimmed wheel. The woman on the right is adjusting her helmet. They are standing on a paved surface with a low stone wall and trees in the background. A large, stylized blue and white graphic element is visible on the right side of the image.
